BIOGRAPHICAL NOTE

The Environmental Ethics Certificate Program (EECP) is a non-degree program offered as an enhancement to an undergraduate or graduate degree. The EECP provides an interdisciplinary forum for students, faculty, and the community to discuss social and scientific responsibilities toward our environment. Formally part of the College of Environment and Design, the EECP provides a forum in which philosophers, scientists, and scholars from all other disciplines can discuss social and scientific responsibilities toward our environment in a rational manner which clearly defines problems, considers all the information, and maintains our values.

The International Conference on Environmental Enrichment (ICEE) brings together animal welfare scientists and others who care for captive animals. The conference allows for the exchange of information among diverse groups that participate in environmental enrichment.

SCOPE AND CONTENT NOTE

Includes commercial copies of broadcast content related to environmental issues and footage of lectures and programs on UGA's campus, among other materials.
